

Work with MetaTrader5

1. Getting Started

The trading platform provides a simple and user friendly interface. All commands can be accessed from the main menu, and the most frequently used ones are available on the toolbar. Quotes are displayed in Market Watch, while from the Navigator you can manage technical analysis and algorithmic trading tools.

2. How to Open a Demo Account

Demo account is a virtual account which allows to learn trading without risking real funds. In order to open a demo account, go to your Private Office on Grand Capital website, click "Create an account", go to "Demo Accounts" tab and choose the desired option.

Create an account		
Trading accounts	Demo Accounts	
Standard	MT5	Binary
The widest range of trading instruments: currency pairs, metals, CFD-contracts	The account is designed for trading in MetaTrader 5: the new, improved version of the trading terminal with advanced functionality.	Just determine the direction the asset's price will go Profit up to 86% per transaction

All settings are grouped in several tabs based on what they do:

Server — setup of server connection, configuration of a proxy server, and other important settings;

Charts — common settings of price charts and parameters of objects management: object selection straight after creation, immediate object configuration, and docking parameters;

Trade — default parameters applied to the opening of new orders. They include: financial instrument, number of lots, deviation, and placing of stop orders;

Expert Advisors — common settings for all Expert Advisors. They include: disabling operation of Expert Advisors, enabling importing functions from external DLL libraries and Expert Advisors, as well as a number of other features;

Events — configuration of alerts of system events. You receive important alerts about connection loss, arrival of newsletters and other events;

Notifications — sending push notifications to mobile devices from the trading platform;

Email — email parameters for sending messages straight from the platform;

FTP — settings for publishing reports on the Internet. The trading platform allows saving and automatically publishing reports about the account state in real time. This is done over ftp based connection, which can be configured in this tab;

Community — details of your MQL5.community account;

Signals — settings for the Signals service in the trading platform.
